

AIF Performance

— **March 2025** —

True to our brand name, we are
Team “AIF & PMS Experts” that is:

- Process-driven investment approach
- Largest digital platform for AIF & PMS
- Dynamic team led by experienced leadership
- Trusted name with proven track record
- Commitment to eternal knowledge sharing
- Client-centric and customized wealth strategies
- Strategic partnerships based on thorough due diligence
- Technology-enhanced experience
- Robust compliance and governance

Our forte is AIFs, PMS and GIFT City
Investment options available in India.

March 2025

"The End Is Just the Beginning" A Powerful Reminder

Dear Valuable Investors,

Josh Brown's perspective in "This Is The End" offers more than a gloomy view—it highlights the inevitability of change and the cyclical nature of markets. In the world of investing, the conclusion of one phase doesn't spell disaster; rather, it can ignite growth, spark innovation, and create fresh opportunities. Just as in life, "the end is simply the start of something new."

Throughout history, we've witnessed major market crashes that initially felt like the end of the world. From the dot-com bubble burst in 2000 to the financial crash of 2008, and even the pandemic-induced crash of 2020, markets have repeatedly shown us that downturns, while painful, often set the stage for the next wave of growth. These market crashes, once viewed as moments of despair, became fertile ground for opportunity. The end of these turbulent periods gave birth to some of the most successful and lucrative market recoveries we've seen

Navigating Current Market Challenges: A Path to Potential Recovery

Today, we find ourselves once again at a critical juncture. Investor sentiment is understandably cautious, and the market is grappling with several key challenges:

- **Slower Earnings Growth:** In Q2 & Q3, earnings growth has consistently underperformed expectations, contributing to a more negative market outlook.
- **Slowing GDP Growth:** Economic projections have become less optimistic, with real GDP growth expected to drop from 8.2% in FY 2023-24 to 6.4% in FY 2024-25.
- **RBI's Tight Monetary Policy:** The Reserve Bank of India's hawkish approach to interest rates, coupled with a liquidity deficit, is placing additional pressure on the market.

- **Fiscal Deficit and Government Spending:** While the government has managed to reduce the fiscal deficit from 5.6% to 4.8%, this reduction may limit the
- **Capex Slowdown:** Delays caused by election-related issues are affecting the timely execution of infrastructure projects, potentially slowing the broader economic recovery.
- **Decreased Consumption:** A noticeable dip in consumer demand is beginning to weigh on business performance and investor confidence.

However, despite these challenges, there are encouraging signs that indicate a potential recovery is already in motion. Here are some glimmers of hope that could signal a market turnaround:

- **Stronger-than-Expected Q3 Earnings:** Corporate India has demonstrated impressive resilience, with Q3 earnings growth surpassing expectations, suggesting that the market could be on the cusp of a recovery.
- **Government's Increased Capex:** The government has significantly boosted its capital expenditure allocation to ₹112 lakh crore for FY 2025, marking a 10% increase from the previous year. This investment will help drive infrastructure growth, create jobs, and stimulate economic activity.
- **Tax Rebates for Consumers:** Tax rebates for middle- and lower- income groups are expected to help boost consumption, injecting much-needed momentum into the economy.
- **RBI's Liquidity Measures:** The RBI is expected to ease liquidity by implementing a 25 basis point repo rate cut and conducting open market operations (OMOs), which should help improve liquidity over the next 36 months.
- **Declining Crude Oil Prices:** The softening of crude oil prices, coupled with the potential resolution of the Russia-Ukraine conflict, could ease inflationary pressures and provide some relief to the market.
- **By embracing transformation, accepting market fluctuations, and staying resilient, we are better prepared to handle the inevitable ups and downs that markets present.**

So, when it feels like the market is nearing its "end," remember: it's not the final chapter. It's simply another turning point in a journey that, while unpredictable, is full of exciting potential. The key lies in maintaining focus, patience, and optimism, understanding that every ending has the potential to usher in something even better. The crashes of the past have ultimately given way to the greatest opportunities of the future— don't miss the chance to seize what comes next.

Now is the Time to Invest

While short-term volatility may be unsettling, history has proven that downturns often present the best opportunities for growth. Whether it was the dot-com bubble, the subprime mortgage crisis, or the pandemic crash, those who saw the potential during times of despair have been richly rewarded.

Now, with government support, easing inflation, rising consumption, and improving FPI flows, we are entering a new phase of growth. The current market valuation presents a prime opportunity for investors to position themselves for the recovery ahead.

Patience and Focus: The Key to Success

As investors, we must remember that volatility is a natural part of market cycles. The key to success is staying focused, being patient, and recognizing the long-term potential ahead. The next few years are likely to be a period of significant growth, and the best time to invest is now— while valuations are still attractive. Thank you for your time. Let's embrace the journey ahead with patience, focus, and confidence.

Thanks & Regards

Vikas Agrawal
